Re: Beach Drive / Holloway Lane Water Main Replacement Project  
Property I.D.: xxxx Beach Drive

Dear CWA Member:

As you may be aware, the existing water main on Beach Drive will be replaced with a new 6-inch water main in the fall of 2018. Please find attached the following items related to this project:

- 1) Project Plan Sheet: This sheet reflects the new water main location and proposed construction near your residence.
- 2) Photo Plan Sheet: Given that in most cases, this project will additionally include the installation of new water services and meter boxes, we have attached a Photo Plan which reflects the new water meter box for your residence. This plan shows the proposed location of the new meter box, as well as the work related to reconnecting the water pipe serving your residence. The new water meter box will be installed within the County Right-of-Way, however, the work related to reconnecting to your service pipe will be on your property (this is typical for this type of work). The disturbed area on your property will be restored as reflected in this plan.

You can help us by noting any existing features that are not shown on the Photo Plan. Please bring the annotated plan to the open house for the Project (see information below), or return it in the enclosed self-addressed, stamped envelope. If you have questions, or comments, regarding the enclosed information, feel free to contact us at the Project Engineer's Office, at 360-279-0615, or email to [greg@caneengineering.com](mailto:greg@caneengineering.com).

Open House: If you would like to discuss the project with us in person, the open house for the project will be held on Monday, December 11, 2017 from 6 P.M. to 8 P.M. at the Camano Water Association Office (82 W. Monticello Drive).

Sincerely,

Camano Water Association

Cane Engineering

Daniel Peterson, Operations Manager

Gregory Cane, P.E., Project Engineer
